

Allergy Policy and Procedure

We are aware that children may have or develop an allergy resulting in an allergic reaction. Our aims are to ensure allergic reactions are minimised or, where possible, prevented and that staff are fully aware of how to support a child who may be having an allergic reaction.

Our Procedures:

- Our staff are made aware of the signs and symptoms of a possible allergic reaction in case of an unknown or first reaction in a child. These may include a rash or hives, nausea, stomach pain, diarrhoea, itchy skin, runny eyes, shortness of breath, chest pain, swelling of the mouth or tongue, swelling to the airways to the lungs, wheezing and anaphylaxis.
- We ask parents to share all information about allergic reactions and allergies on child's registration form.
- We share all information with all staff and keep an allergy register in the nursery kitchen.
- Where a child has a known allergy, the Nursery Manager will carry out a full Allergy Risk Assessment Procedure with the parent prior to the child starting the nursery and shares this assessment with all staff.
- We remain a nut free environment and make sure signage makes this policy clear for all visiting the setting.
- All food and snacks at the setting will be prepared with the allergy list in mind.
- If a child has an allergic reaction to food, a bee or wasp sting, plant etc. a first-aid trained member of staff will act quickly and administer the appropriate treatment, where necessary. We will inform parents and record the information in the Accident Book and on the allergy register.
- If an allergic reaction requires specialist treatment, e.g. an EpiPen, then at least two members of staff working directly with the child and the manager will receive specific medical training to be able to administer the treatment to each individual child.

Transporting children to hospital procedures

The nursery manager/staff member must:

- Call for an ambulance immediately if the allergic reaction is severe.
- We will not attempt to transport the sick child in our own staff vehicles.
- Whilst waiting for the ambulance, contact the parent(s) and arrange to meet them at the hospital.
- Arrange for the most appropriate member of staff to accompany the child taking with them any relevant information such as registration forms, relevant medication sheets, medication and the child's comforter.
- Redeploy staff if necessary to ensure there is adequate staff deployment to care for the remaining children. This may mean temporarily grouping the children together.
- Inform a member of the management team immediately.
- Remain calm at all times. Children who witness an incident may well be affected by it and may need lots of cuddles and reassurance. Staff may also require additional support following the accident.

Date: November 2020

Our Allergies Policy and Procedure will be reviewed annually.
